## Mapping of PEOs with Departmental Mission

### i. Civil Engineering Technology

| PEOs  | Department Mission  |
|---|---|
| To enable the students to work consistently by providing a solid foundation and training them in market oriented technical and management skills.   | Imparting high quality education and training.  |
| To attain the analytical expertise for improving employability by analyzing the challenging problems in the field of Civil Engineering Technology and developing the necessary and suitable tools for them. | Providing services with focus on layout and evaluation of different civil engineering technology parameters |
| To inculcate social values into students and enabling them to perform ethically and responsibly.  | To contribute towards socio-economic development of Khyber Pakhtunkhwa.                                     |

### ii. Electrical Engineering Technology

| PEOs  | Department Mission   |
|---|--|
| Engineering Technologists who are competent, employable, can demonstrate sound knowledge and hand-on- skills, meeting needs of the modern industry. | To provide students with high quality engineering Technology knowledge at undergraduate. |
| Engineering Technologists who can apply their knowledge and skills to creatively solve, analyze and design electrical/electronic systems.           | To prepare technologists for innovative solutions with focus on design and research.     |
| Engineering Technologists who are effective in communication and interpersonal skills with high professional and ethical standards.                 | Equipping students in scientific, economic and social development to serve the society.  |

### iii. Mechanical Engineering Technology

| PEOs  | Department Mission  |
|---|---|
| Demonstrate a blend of Engineering technology and professional skills | Serve the engineering profession by offering high quality education                           |
| Perform ethically and in a socially responsible manner                | To create professionals and contribute towards society  |
| Strive to enhance learning and interpersonal skills.                  | By providing innovative solutions with focus on research in Mechanical and allied disciplines |

## Program Educational Objectives (PEOs)

### i. Civil Engineering Technology

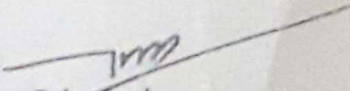

- PEO 1: To enable the students to work consistently by providing a solid foundation and training them in market oriented technical and management skills.
- PEO 2: To attain the analytical expertise for improving employability by analyzing the challenging problems in the field of Civil Engineering Technology and developing the necessary and suitable tools for them.
- PEO 3: To inculcate social values in students and enable them to perform ethically and responsibly.

### ii. Electrical Engineering Technology

- PEO 1: Who are competent, employable, can demonstrate sound knowledge and hand-on- skills, meeting needs of the modern industry.
- PEO 2: Who can apply their knowledge and skills to creatively solve, analyze and design electrical/electronic systems.
- PEO 3: Who are effective in communication and interpersonal skills with high professional and ethical standards.

### iii. Mechanical Engineering Technology

- PEO-1: Graduate will demonstrate a blend of engineering technology and professional skills.
- PEO-2: Graduate will perform ethically and in a socially responsible manner.
- PEO-3: Graduate will strive to enhance learning and managerial skills.
